

FCC:

Despite your efforts on public airwaves to silence free speech. I am concerned over the efforts to silence satellite radio services rendered to its loyal customers.

XM radio is a private service offered to subscribing members. I apologize for people losing business over the loss of over million customers on public airwaves. But members like myself pay good money to avoid commercials and the poor broadcasting that have make AM/FM unlistenable. I am a sales representative and rely on accurate traffice reports. I can not rely on a station that plays 10 minutes of commercials and then glosses over traffic. However, the debate should be mute since I pay for this service, that consequently some might see as a luxury.

Feel free to contact a real person like myself regarding this debate, and not rely on the corporate supporters of the The National Association of Broadcasters.

Please Oppose HR 4026.

Sincerely,

Kevin Coffey
